UNIVERSITY OF CALIFORNIA RIVERSIDE

Student Referendum Plan

FINAL REPORT

January 2009

 $\ensuremath{\mathbb{C}}$ 2009 The Regents of the University of California, All Rights Reserved

In the fall of 2008, the University of California, Riverside ("UC Riverside", "UCR", or the "University") retained Brailsford & Dunlavey ("B&D") to perform a Student Referendum Plan (the "Study") for a possible expansion to the campus Student Recreation Center ("SRC"). As a part of this assessment, B&D conducted focus groups, benchmark analysis, and a student survey to ascertain preferences, develop facility demand projections, and fee support. Throughout the process, B&D coordinated efforts with Jon Harvey, Principal Educational Facilities Planner.

The Student Referendum Plan provides the data necessary for UCR to shape and give direction to SRC improvement projects and the direction any referendum and education campaign may take. This Study does not provide a feasibility study for any improvement as capital budgeting, outline programming, site analyses, and detailed financial analyses were not included within this scope of work. A space program, site analysis, and detailed project program was developed by Cannon Design concurrently with this study. B&D and Cannon worked collaboratively during these interrelated but separate studies.

This report sets forth B&D's findings and recommendations for the University of California, Riverside's Student Referendum Plan. The findings contained herein represent the professional opinions of B&D personnel based on assumptions and conditions detailed within this report. B&D has conducted research using both primary and secondary information sources which are deemed to be reliable, but whose accuracy cannot be guaranteed.

University of California, Riverside Student Referendum Plan Page i

PREFACE

Brailsford & Dunlavey would like to thank the following individuals for their participation and insight during the course of this Study:

Capital & Physical Planning

Tim Ralston, Associate Vice Chancellor, Capital PlanningKieron Brunelle, Director, Capital & Physical PlanningJonathan Harvey, Principal Educational Facilities Planner

Steering Committee

Lindy Fenex, Director, Recreation Programs Sol Kim, Recreation Facilities Governing Board Ozzie Rodriguez, Recreation Facilities Governing Board Tony Yang, Graduate Student Association Peter Burke, Academic Senate

Academic Planning and Budget

Eileen O'Connell-Owens, Director, Finance and Capital Budget Jerry Garcia, Principal Budget Analyst

This Report contains a series of demand projections and square feet calculations. Unless noted otherwise, all square feet notations are net square feet ("nsf") reflecting the total assignable or useable area. Gross square feet ("gsf") is noted where applicable, such as describing total indoor area of facilities including structure, mechanical, and other unassigned spaces. All references to enrollment are headcount figures unless noted otherwise.

Tab 1

Introduction

In 1994, the University of California, Riverside opened the Student Recreation Center ("SRC") providing new opportunities for recreational activities on campus in line with other University of California campuses. The design of the 86,140 gross square feet facility was planned for a campus headcount of 11,000 students. Since the SRC opened, the campus headcount has more than doubled from approximately 8,600 (Fall 1994) to 18,000 students (Fall 2008). In addition to the increased campus population, participation rates among all user segments have soared with evolving activity preferences. Accordingly, generally accepted planning standards suggest that the University is facing an acute shortage of recreation space and crowded conditions. The Student Referendum Plan was undertaken to accurately determine the disparity between existing facilities, demand for recreational activities, and support for improvement to SRC facilities. This Study only focuses on the demand for recreational activity space. The intent of this Study is to provide the University with the data necessary to determine the support for, and timing of, any information or student referendum process. B&D worked closely with Cannon Design, who was concurrently developing the Detailed Project Program.

Work Plan

B&D's approach required an active working relationship with University staff and students to develop a detailed understanding of the institution's mission, relevant stakeholders, customer groups, and strategic project objectives which best serve that mission. The work plan included the task areas:

- a series of focus groups were conducted with faculty, staff, and students to gain qualitative information regarding recreation preferences and campus life (Tab 2);
- a benchmark analysis of recreation centers at select UC and CSU campuses was conducted to compare existing facilities, current trends, and fee policies (Tab 3);
- an electronic survey was administered to current UC Riverside students to identify recreational preferences, quantify demand for activities, and support for proposed improvements (Tab 4); and
- a **demand analysis** was developed to project demand for recreational activities based on data collected during the electronic survey (Tab 5).

Findings

UC Riverside's existing indoor student recreation facility provides approximately 4.8 gross square feet ("gsf") per student compared to the generally accepted planning standard of 8.5gsf to 10.5gsf per student. These national averages are based on areas of indoor space within dedicated student recreation centers. Given the University's desire to help students achieve a balanced and healthy lifestyle while maintaining academic excellence through highly rigorous programs,

UCR's gross square foot ratio should be closer to that of the national average. Correspondingly, survey results indicate that recreational activities that maintain personal health and wellness, provide a high quality of life (88% very important or important), mitigate stress (82% very important or important), and support strong mental health (83% very important or important) are of critical importance to UCR's students. Over two-thirds of students (68%) believe that participating in recreation is important or very important to their academic success.

Students and the University both recognize the impact recreation facilities have on retention and recruitment of students. Students actively engaged in campus related activities are typically more invested in the institution and therefore graduate at higher rates. Properly sized recreation centers with limited overcrowding and easy access to equipment and programs provide students with a healthy avenue of engagement. It is critical to properly size program elements at times when students are available. Nationally, increasing numbers of students are working in addition to carrying full academic loads. Eighty-two percent of UCR students surveyed currently work ten or more hours per week, and over fifteen percent are working at least full-time. The two most important factors influencing when students participate in recreational activities are class and work schedules. Adequately accommodating these specific windows of recreational demand between students' class and work schedules is necessary to establish and support balanced and successful lifestyles.

B&D's demand projection model confirmed that recreational activities are in high demand by the student body. Students placed high priorities on cardiovascular fitness, weight machines, and free weights, indoor walking, group fitness, and lap swimming. Existing spaces are only able to accommodate between 30% and 50% of current demand for high priority activities (table 1.1). Additionally, most of the existing spaces are poorly configured and do not adequately meet program requirements further aggravating activity crowding and student participation. Dedicated weight and fitness space represents the greatest deficit between demand and existing space. While shared facilities such as Physical Education Pool provide minor expanded program opportunities, the priorities driving scheduling limit student access and should be viewed as a temporary solution at best.

	Space	Existing	Space Allocation Based On		Difference		nce	
	Туре	Rec Space	Prioritiza	tion of	f Demand			
Weight and Fitness	Sq. Ft.	6,500	20,800	to	23,600	(14,300)	to	(17,100)

Recommendations

Select Components					
	Option A	Option B	Option C		
Overall Size (gross sf)	92,000	70,000	40,000		
Weight & Fitness (net sf)	13,000	12,000	11,000		
Group Fitness Studios	3	2	1		
Multi-Sport Gyms / Courts	2	1	1		
Multi-Activity Courts	1	1	0		
Student Fee Per Quarter	\$180 to \$190	\$150 to \$160	\$100 to \$110		

Table 1.2: Option Comparison

Student support for a fee to fund the potential recreation center expansion was one of the most important issues analyzed in B&D's study. In the survey, students were presented with three options for a possible expansion and improvement to the SRC as well as the associated fee for

each option (table 1.2). Option A represented the largest and most comprehensive expansion of approximately 92,000gsf plus outdoor pool space (\$180 to \$190 per student per semester fee increase), option B represented a more mid-sized expansion of 70,000gsf plus outdoor pool space (\$150 to \$160 per student per semester), and option C represented the most targeted expansion of 40,000gsf plus outdoor pool space (\$100 to \$110 per student per semester). Each of the individual options received slightly more than 50% of students indicating they would be likely to support or very likely to support the option. When asked to select between the three options, option C was the most favored (chart 1.3). B&D recommends that the University pursue option C as the most viable expansion option for students. Additionally, this program option should be slightly modified to increase weight and fitness and group fitness space to meet the high demand present on campus. Any increase in project size should still correspond to the fee level tested on the survey.

Based on the fee support shown in the survey, it is B&D's recommendation that the student referendum be postponed. Although 53% of respondents are very likely or somewhat likely to support option C, B&D concludes that this support level may not be sufficient to obtain student approval for the expansion in the referendum. Due to the survey's margin of error and other factors typically impacting referendum outcomes, B&D generally recommends placing an issue on the ballot when a survey demonstrates at least 60% support. Additionally, the requirement

EXECUTIVE SUMMARY

that 20% of the campus population vote to validate a referendum presents challenges. While 53% of students believe that improvements are a high or very high priority for the University, 42% of students believe that the SRC is in excellent or very good condition. Another 32% of students believe the SRC is in satisfactory condition. The overall good condition of the facility may present challenges to educating students that improvements are needed.

Postponing the referendum will allow the University to use the time available to plan, create, and market an educational campaign for the recreational needs of the University. A crucial step in the referendum planning process is the development of project literature, web sites, and other resources student leaders can use to educate the student body on the needs and demands for expanded recreation opportunities at UCR. Major topics that should be discussed with the student body includes the exact fiscal impact due to fees for each student, the expanded opportunity for student employment, the student control of facility funding, and the benefits of new and expanded recreation and fitness opportunities on campus. It is imperative that students and student leaders be involved and direct any educational campaign. It is also important that the University administration and staff is not identified with the project or the successful referendum outcome, but rather students are seen as the leaders and disseminators of information allowing students to make an informed decision on the ballot.

Additional Considerations

As the University and students seek to meet the recreation needs of the UCR student population, they should consider the following factors:

- Efforts to create a partnership with the students by developing potential fundraising opportunities should continue at the University. Fundraising, an attractive prospect for students, would help to reduce the cost of the project and student fees. It would also serve to create a partnership with the University over the project as both parties, students and administration, would be invested in its completion.
- The current economic downturn is on the minds of most students. Strained federal and state budgets may further impact the costs of education and University supported services. With the unknown prospects of tuition increases, enrollment decreases, and hiring freezes within the state of California, students are uncertain about what their future at UCR might entail. This uncertainty represents a challenge to overcome during any informational and referendum campaign.

Tab 2

Objective

The purpose of the focus groups is to engage faculty, staff, and students in dynamic conversation about the recreation center and referendum issues at the University of California, Riverside ("UCR"). Brailsford & Dunlavey ("B&D") in coordination with the Student Referendum Planning Steering Committee focused on understanding ways in which renovating and expanding the existing Student Recreation Center ("SRC") can positively affect student life on campus. The focus groups are intended to yield qualitative data for the researchers, while identifying sensitivities and previously unconsidered issues surrounding the current facility and potential new recreation center project at UCR.

Methodology

The Committees organized focus groups to obtain a diverse mix of feedback from a wide range of UCR faculty, staff, and students. Twenty individuals participated in the focus group sessions on October 7, 2008, at the Student Recreation Center's Multipurpose Room B. Additionally, thirteen random intercept interviews occurred on campus. Intercept interview comments are included within the overall focus group report. For this component of the Study, quality of discussions with participants is valued over the quantity of participants.

A moderator from B&D led the focus group session and guided the conversation to address recreation and referendum issues. The moderator presented a series of open-ended questions and encouraged individuals to discuss tangential issues and engage in dynamic conversation. While the moderator was predisposed to obtaining answers to the questions asked, he or she also paid close attention to participant-generated issues raised during the discussion. Information collected during these interviews was used to guide student survey questions and inform B&D's recommendations.

Focus Group Composition

Faculty and Staff – 6 participants (1 female and 5 male) Students – 5 participants (2 female and 3 male) Students – 2 participants (1 female and 1 male) Students – 7 participants (3 female and 4 male)

Summary of Findings

Why did you choose to attend UCR? Overall, how would you rate your experience here?

Participants attend UCR for a variety of reasons including its location, prestige, and the availability of housing. UCR's proximity to Los Angeles and San Diego is perceived as an asset

since students travel only a few hours to and from their permanent address. In addition, the availability of quality housing such as Pentland draws students to campus.

Many first-time students feel that excluding the SRC from the orientation tour creates a barrier of entry. Several students admit that because the facility was not included in their tour that they were unaware about what the facility had to offer. One graduate student mentioned that the SRC was included in the orientation ten years ago.

Are you familiar with the recreational sports and facilities offered at UCR? How often do you use them? How well do the facilities meet your needs?

The average student visits the SRC about two to four times a week. Many enjoy the availability of intramurals, club sports, and recreation activities. Basketball, badminton, martial arts, and volleyball are among the most popular sports, while dance classes and "Ab Attack" are the most popular recreational activities. Dance classes are often held outside on the tennis courts to accommodate demand and / or the lack of facility space.

Students believe the SRC is busiest between the hours of 4:30pm to 8:00pm. During that time, it is common to see students standing in line for elliptical machines and weight equipment. Participants feel that the current facility's size is limiting, as the facility is often overcrowded; for instance, the current number of basketball courts and outdoor fields necessitates some intramural matches to last late into the evening.

One student mentioned that dance classes are often held outdoors due to the lack of multipurpose rooms. The limited number of parking spaces adjacent to the facility also has some students hesitant to participate more often.

Do you have or have you had a membership to an off-campus health club / gym? Why did you join? How much do you pay?

The majority of students do not have memberships to off-campus health clubs because of its high cost of membership. Yet, students are willing to pay for specific recreational activities such as indoor rock climbing. The current overcrowding has many graduate students resorting to memberships off campus.

What fitness / recreational activities are the most important to you?

Most participants enjoy the variety of activities the SRC has to offer and many partake in several recreational sports or classes throughout the academic year. Participants involved with these classes wish to see a greater number of classes at different times of the day.

What is your opinion of the current state of "campus culture" at UCR?

UCR students perceive their campus as a commuter school, a place that lacks dynamic social interaction.

How much of a student fee would you be willing to pay per semester to have a new recreation facility that had all of the features you want?

Students understand the marginal benefit of each additional dollar and some are willing to pay more to obtain a sound product. Participants say that they are willing to pay double the current fee if the additional revenue translates into equal or better quality when compared to its off-campus competitors.

If new or expanded recreation facilities were to be built on campus, what specific activity spaces would you want to have included?

The current SRC square footage lacks adequate space to accommodate participating students comfortably. Students preference is for expanded weight and fitness room, additional cardiovascular machines, additional multipurpose rooms, additional basketball courts, and an expansion of the outdoor excursion program. Additionally, students desire new program elements in the SRC including an outdoor pool, indoor climbing wall, and a Multipurpose Activity Court ("MAC"). Students are indifferent about an indoor jogging track, sauna, and batting cages.

Specific thoughts from students regarding the various activity spaces are summarized below:

Weight and fitness room

- Current size is too small and crowded
- Perceived as men only
- Women feel intimidated and want separate room
- Desire classes on proper equipment usage

Cardiovascular machines

- More cardio fitness machines
- Provide enough space between machines

Multipurpose rooms

- Enough space for stretching area (warm up / cool down area)
- Individual room for martial arts and dance
- 2 to 4 more rooms

Basketball courts

- 3 additional courts
- Seating area for intramural spectators

Outdoor excursion program

- Facility with enough space to store equipment and rentals
- Allow enough programming space for classes / programs

Outdoor pool

- Lounge area with BBQ grills, cabanas, chairs
- Lap swimming
- Olympic sized pool
- Water exercise classes / swimming lessons
- Ability to rent entire facility for events

Indoor climbing wall

- 30' to 40' climbing wall with bouldering wall
- Students unaware of current operating hours of the existing outdoor challenge course
- Climate affects students willingness to use outdoor facility

MAC

• Facility large enough for both indoor soccer and basketball

Indoor jogging track

- Some students had interest
- Outdoor track is adequate because of the pleasant Southern California climate

Steam room / sauna

- Many people did not see a need for a steam room
- Sauna would be a great complement to a new outdoor pool

Batting cage

• Only a handful of people expressed interest in a batting cage

Beyond these basic recreation facilities, what types of services, programs, and amenities should be provided?

There is a range of services, programs, and amenities desired by students. They are resolute about added parking, increased hours of operations, increased number of classes, and inclusion of a healthy food vender. Participants are indifferent about adding lounge space, towel service, and locker rooms.

Parking

- More spaces adjacent to facility
- Currently seen as a barrier to entry

• Lot 24, located immediately west of the Track Stadium, is the farthest students are willing to park

Hours of operations

• Increased hours of operations (open to 2:00am)

Classes

- More dance classes
- Courses on healthy eating
- Weight loss programs
- Athletic training / massage therapy
- Self-defense program
- Inexpensive personal trainers

Dining

- Facility offering healthy food options (smoothies, juices, salads, sandwiches)
- Pro shop option

Lounge space

- Current perception of the SRC is that it is a place just to workout
- Students prefer using the Commons as an area to hangout

Towel Service

• Many students prefer bringing their own towels

Locker rooms

- Students prefer that the locker rooms are available during events
- Renovate to match current usage

Brailsford & Dunlavey January 2009 Page 6

Tab 3

Objective

An analysis of select peer institutions was conducted to develop a profile of recreation facilities, programs and services at each school. The objective of the competitive context analysis was to understand UCR's current position among peer institutions in California. It will also try to reveal how these facilities can lead to improvements in the quality of student life, and enhance the University's position in the market place for recruitment and retention of students.

Methodology

B&D employed a variety of market analysis tools to gather the data necessary to complete a detailed analysis of UCR's current and potential position in the market place. Nine schools were selected for this comparative analysis. They represent either those most competitive with UCR in terms of cross applicant overlaps or are schools that have built new facilities. In order to remain consistent with information available to these potential students, B&D utilized the data even when minor inaccuracies were evident when compared to the most recent information from common data sets available on the school's website.

This detailed analysis examined information on tuition and fees, academic reputation, enrollment, admissions, and location. This diversity of information allowed a thorough understanding of the University's current position in the market place.

Summary of Findings

The updated summary of findings from the competitive context analysis may be found in Exhibit A. The following nine institutions were chosen:

- California Polytechnic State University, San Luis Obispo (Cal Poly)
- California State University, Fullerton (CSUF)
- California State University, Long Beach (CSULB)
- California State University, Northridge (CSUN)
- San Diego State University (SDSU)
- University of California, Davis (UCD)
- University of California, Irvine (UCI)
- University of California, San Diego (UCSD)
- University of California, Santa Barbara (UCSB)

The construction of a contemporary Student Recreation Center provides students additional opportunities to remain on campus during various periods of the day. New facilities often help improve or enhance a University's academic reputation by supporting recruitment and retention efforts. These facilities can also help improve the quality of student life on campus.

BENCHMARK ANALYSIS

Overall, UCR's SRC is comparable to the other facilities studied in terms of programming and activities, although the physical space and amenities are below average. UCR offers nine intramural sports, close to the average of twelve. UC Davis offers the greatest number at twenty seven. UCR offers seven sports clubs, less than half the average number of 20 sports clubs. The number of classes offered as well as pricing policy for class related fees are comparable to the average. The SRC is the second smallest facility (or facility with confirmed future expansion) within the analysis, only SDSU's facility is smaller at approximately 73,000gsf. Although the size of the facility is smaller, the total enrollment is the smallest of any institution in the study which accounts for a 4.8gsf per student greater than the average of 4.2gsf per student. The SRC also has the least amount of space dedicated for weight and fitness equipment at approximately 7,000nsf compared to the average of 19,000nsf.

		Total	Rec Center Size	Poc Space por		Recreation Fee (Academic Year)			
University				Student (gsf)	Primary Users	Original	Expansion	Total	
	University of California, Riverside (UCR)	18,079	86,000	4.8	Rec, Athletics	\$177	N/A	\$177	
	Peer Universities								
1	California Polytechnic State University, San Luis Obispo (Cal Poly)	19,471	170,000	8.7	Recreation	\$270	\$195	\$465	
2	California State University, Fullerton (CSUF)	36,996	95,000	2.6	Recreation	\$100	N/A	\$100	
3	California State University, Long Beach (CSULB)	37,890	120,000	3.2	Recreation	\$220	N/A	\$220	
4	California State University, Northridge (CSUN)	36,208	100,000	2.8	Recreation	\$260	N/A	\$260	
5	San Diego State University (SDSU)	34,889	73,000	2.1	Recreation	\$146	\$130	\$276	
6	University of California, Davis (UCD)	31,426	105,000	3.3	Recreation	\$204	N/A	\$204	
7	University of California, Irvine (UCI)	27,631	119,000	4.3	Recreation	\$210	Not Needed	\$210	
	University of California, San Diego (UCSD)	28,200	188,000	6.7	Rec, Athletics	\$117	N/A	\$117	
9	University of California, Santa Barbara (UCSB)	21,868	100,000	4.6	Recreation	\$134	\$104	\$238	
	Average	30,509	119,000	4.2		\$185	\$143	\$232	

Information was collected on the operations of recreation programs at several peer institutions. The data represents either actual revenues and expenses or planned budgets for future facilities. Overall, UCR is below the average for the various categories analyzed. Several of these institutions have recent facilities and therefore have higher student fees than UCR which accounts for higher revenue streams. Both SDSU and UCI collect significantly more speculative revenue (non-student memberships, programs, rentals, etc.) than UCR.

		Annual Revenue			Annual Expenses				Number of Staff		
University		Student Fee	Speculative Revenue	Total	Full-Time Personnel	Part-Time Personnel	Non-Personnel ²	Total	Full-Time	Part-Time (Approx.)

CALIFORNIA POLYTECHNIC STATE UNIVERSITY, SAN LUIS OBISPO

Project Drivers

With increasing student complaints about overcrowded and dated facilities, Cal Poly started to work on an ASI Facility Master Plan in early 2003. During the planning, the University looked at improvements to its existing University Union, the UU Plaza, the Student Recreation Center, and child care facility. The recommendations included the following:

- Coordinate with campus' move to the north as over 2,000 beds will be built on that side of campus
- Reinvigorate the campus core including the union
- Update existing facilities

In the spring of 2005, Cal Poly initiated a referendum to support a \$100 million bundled project which would include a student union renovation / expansion, a recreation center expansion, a new student life building and an outdoor sports complex. With 37% of students voting in favor of the project, the

referendum failed. The project would have been funded by a phased-in fee of \$21 per quarter to \$175 per quarter.

Cal Poly revisited the recreation center proposal in spring 2007 with the initiation of a student referendum to support the recreation center only. The referendum passed with 75% of student voters authorizing a fee increase of \$65 per quarter to be implemented upon construction completion. Construction is scheduled to occur from September 2009 to August 2011.

Campus Profile Cal Poly SLO Total Enrollment: 19,777 Recreation Center Fee: \$90 / quarter (original) \$65 / quarter (increase upon expansion)

Current Facilities

Cal Poly's \$20 million Student Recreation Center opened in June 1993 and was the first facility of its type in the CSU system to be built for the general recreation needs of the student body. Including its swimming pool component the facility's size is 90,000 square feet—which includes the following inventory of spaces:

- 4 basketball courts (also a 3,400 seat venue)
- 2 cardiovascular equipment rooms
- 2 free / machine weight rooms
- Non-activity spaces include:
 - 11 administrative offices
 - 26 faculty offices
 - 1 pro shop
 - 2 locker rooms

- 9 racquetball / handball courts
- 1 outdoor swimming pool (19-lane 50m by 25 yards)
- 3 indoor volleyball courts; 2 outdoor sand courts
- Combative / martial arts room
- Dance room

Plans for Expansion

Cal Poly plans to double its total square footage of usable space for programmed activities and open recreation. The facility is in the process of being designed by Cannon Design. The general contractor is Sundt. The expansion is set to include:

- Tripled exercise space
- Indoor jogging track
- Two-court gymnasium
- Wellness center
- Six racquetball courts rebuilt with squash and wallyball configurations.
- Leisure pool and deck
- Multi-activity center for indoor soccer, floor hockey and concerts with state-of-the-art sound system
- Renovated locker rooms
- Energy efficient air conditioning

CALIFORNIA STATE UNIVERSITY, FULLERTON

Project Drivers

Enrollment Growth

From 1995 to 2005, enrollment grew at CSU Fullerton from 22,604 to 32,744 students. Annual enrollment growth of 4% prompted the need for additional recreation space to be provided on campus.

Lack of Student-Dedicated Recreation Space

Campus Profile

CSUF

Total Enrollment: 37,130

Recreation Center Fee: \$20 / semester (initially) \$50 / semester (opening)

Current recreation space had been available at various times throughout the week but did not provide enough space to meet the needs of the student body. With 55 hours per week of drop-in recreation availability in the existing gym, CSUF was well below the average of 112 hours per week offered by its institutional peers.

Plans for Expansion

The Associated Students held focus groups, open forums, and a detailed survey in 1999 to gauge CSUF student's opinions about a new recreational facility. As part of the process, the AS held its first ever "Student Empowerment Workshop" entitled "Shaping Up our AS Rec Sports Program." In 2000, 69% of voting students approved a referendum, which resulted in an increase in their fees of \$20 per semester. The referendum also approved a further increase of the recreational fee to \$50 per semester upon the completion of the facility.

CSUF's project planning committee developed a list of seven planning principles to facilitate its discussions and to provide the most appropriate facility for the campus as possible.

- Use of open design techniques All activities taking place should be obvious from any point in the facility.
- Plan for a large weight training/cardio fitness area Planning committee's research found that recently built recreation centers did not allocate adequate space for their weight & fitness component.

- Design with flexibility in mind Adaptive design measures should be incorporated whenever possible to allow for evolving campus needs and continuing improvements in technology.
- Use good stuff Sacrifice of a higher upfront cost will be made in order to reap the benefits of higher quality materials and equipment.
- Locker rooms shouldn't be big, but they should be high caliber Sauna features will be a consideration.
- Include gathering places Student interactions should occur in gathering places not necessarily associated with workout activities.
- Incorporate clean, natural lighting, and natural design elements – Natural lighting and materials (unpainted cinderblock, stone, earth-tone tiles, etc.) were highlighted as important features of the facility's design.

On July of 2006, the University broke ground on the new \$40 million Student Recreation Center. The facility was designed by Langdon Wilson Architecture and construction management was provided by CW Driver. In May 2007, the Center was awarded "Best Overall Sustainable Design" as part of the 2007 Best Practice Awards for the University of California / California State University Energy Efficiency Partnership Program. The Student Recreation Wellness Center opened in spring 2008, and has since experienced high visitation. The current semester averages 2,300 people per day.

At approximately 95,000 square feet, the facility features the following:

- 17,000 square feet dedicated to cardio and strength training equipment
- Three-court gymnasium
- Multi-purpose activity spaces
- Two racquetball courts
- Multimedia cardio theater
- Elevated jogging track

- Rock climbing wall with boulder
- Outdoor leisure and lap swimming pool
- Martial arts studio
- Dance studio
- Spin room
- Locker rooms
- Administrative office

BENCHMARK ANALYSIS

CALIFORNIA STATE UNIVERSITY, LONG BEACH

Project Drivers

By 2004, California State University, Long Beach recognized that it was one of very few CSU schools without a dedicated recreation center. CSULB had significant deficiencies in indoor and outdoor recreation space on its campus.

Plans for Expansion

And in spring of 2007, with 75% support, the students overwhelmingly passed a referendum in favor of a new Recreation Wellness Center. The total estimated cost of construction is \$65 million, approximately \$4 million under budget due to changes in the current market. Unlike most schools within the California State University System, CSULB has committed to financing the initial cost of the center. The facility will be funded by a fee of \$110 per semester upon opening.

Project challenges have included budget control, as well as arranging the facility on a particularly narrow site. Designed by Cannon Design, the 120,000 square foot facility will feature:

- Large fitness equipment area
- Five basketball courts
- Two racquetball courts
- Three multipurpose fitness rooms
- Indoor jogging track
- Rock climbing wall
- Juice bar and lounge
- Outdoor leisure pool

Construction is scheduled to occur December of 2008 to summer of 2010.

Campus Profile

CSULB

Total Enrollment: 36,868

Recreation Center Fee: \$110 / semester (\$83 / summer)

CALIFORNIA STATE UNIVERSITY, NORTHRIDGE

Project Drivers

Facing an escalating challenge to meet the student life needs of its growing enrollment, California State University, Northridge initiated a referendum in the spring of 2000 for a \$15 million student union expansion. At a semester fee of \$35 upon facility opening, the referendum was approved with 78% success. Over the next several years, CSUN began turning its attention to the campus' increasingly inadequate recreation facilities.

Campus Profile
CSUN
Total Enrollment: 35,446
Recreation Center Fee: \$25 - \$130 / semester ((\$15 - \$78 / summer)

Plans for Expansion

In spring of 2007, the university initiated another referendum—this time for support of a \$65 million recreation center. With a phased fee of \$25 to \$130 per semester, 57% of student voters approved the referendum. Student fees gathered during the first four years of collection will be used to fund project design, while fifth year fees will assist in paying for the costs of construction and ongoing operation of the facility, program and the field complex. Thereafter, the recreation center fee will be increased \$3 per semester to address inflationary concerns.

The 100,000 square foot recreation center is currently being designed by the California-based architectural firm, LPA, Inc. Managed by CW Driver, construction is slated to occur from summer of 2009 to summer of 2011. The orientation of the building will provide views of the local mountains from the building. Several sustainability initiatives will be incorporated through an integrated design approach that utilizes Building Information Modeling (BIM) to attain the most efficient architectural, structural, and HVAC systems. Facility amenities are to include:

- Cardio fitness and weight training rooms
- Three basketball courts
- Multi-activity court for indoor soccer and floor hockey
- Indoor running track
- Outdoor pool complex
- Rock climbing wall

- Multipurpose fitness studios
- Racquetball court
- Boxing studio
- Outdoor field complex
- Locker rooms
- Social lounge
- Administrative offices
 - Outdoor rentals / resource center

SAN DIEGO STATE UNIVERSITY

Project Drivers

Perennially, one of the two largest enrollments in the CSU system, San Diego State University's recreation facility's offerings were not adequate for the size of its population. All SDSU students, with the exception of those who take courses exclusively at the Imperial Valley campus, pay a semester fee of

SAN DIEGO STATE
UNIVERSITY

Campus Profile

SDSU

Total Headcount: 34,889

Recreation Center Fee: \$71 / semester

\$71 to support the Aztec Center (the campus' student union), Cox Arena, the Aztec Recreation Center, Mission Bay Aquatic Center, and the SDSU Children's Center. More specifically, this Student Body Center fee is allocated to fund at least a portion of the following:

- Student access, cost of annual debt payments, and operations of services and facilities for (i) Aztec Center; (ii) Mission Bay Aquatic Center; and (iii) Scripps Cottage
- Debt payments and annual operating expenses at the Cox Arena
- Debt payments for the Aztec Recreation Center
- Operations of services and facilities for the SDSU Children's Center

This fee is the result of a student referendum that was approved in 1990 after two previous referenda had failed. Taking three attempts to attain student approval through the referendum process was only the beginning of SDSU administrators' plight to get these facilities built. It would be another seven years before the ARC and Cox Arena opened as a result of a strenuous town-gown relationship. which included several bouts of litigation. The facility includes several gyms, dedicated weight and fitness zones, multipurpose rooms, and a thirtyfoot high climbing wall.

Current Facilities

Membership to the 73,000 square foot Aztec Recreation Center is available on a month-to-month basis. The average fee per month varies depending on the length of the member's contract. SDSU students signing a 12-month contract will pay \$204 over the course of the year, which is equivalent to \$17 per month. Comparatively, a one-month contract is offered to students for \$36 per month; a nine-month membership totals \$159 or about \$18 per month. SDSU operates the only student recreation center that is open 24 hours per day nationwide.

Brailsford & Dunlavey January 2009 Page 10

Plans for Expansion

A referendum vote was held in spring 2004 seeking "input regarding a proposed increase" in the Student Body Center fee of \$16 per semester in order to construct and operate a new campus swimming pool facility. An approval of the referendum would have raised the fee to \$87 per semester. The student center fee charged during the summer term would have increased from \$4.58 to \$5.58 per unit, which would increase the maximum summer fee level—charged to students enrolling in 12 or more credit hours—from \$53.38 to \$65.38.

At SDSU, the Campus Fee Advisory Committee prepared a voter pamphlet that served as a public notice regarding the proposed fee increase. The seven-page pamphlet was published two months prior to the referendum date and included the following components:

- Dates of referendum
- Poll sites and locations
- Actual ballot text
- Description of current student fee provisions and what proposed fee would support
- Summary of Ballot Issues (Table A)
- Financial Analysis
- Statements, both in favor and against, an increase in the student body center fee
- Rebuttal statements to each viewpoint

What a "Yes" Vote Means	What a "No" Vote Means
 Fee Increase Construction of new pool facility Enhanced fitness opportunities Addition to program menu Large deck for social gatherings Commercial-free sound system Adaptable layout will allow facility layout to evolve in step with user preferences Capacity to seat at least 1,000 spectators (minimum standard necessary to host regional and national tournaments) Students will be priority among the "broadest base of potential users" to be accommodated; and will be the "primary user group." 	 No Fee Increase SDSU will continue to be unable to offer aquatics courses or research programs on campus Cost of swim team holding its practices and events of campus will not diminish Recreation programs for sports clubs, intramurals, fitness, and informal recreation will remain without an aquatics component "SDSU will continue to have the unfortunate distinction of being the largest and only school in the west without a university swimming pool facility."

Table A - Ballot Summary

Due in large part to the well-run and thorough referendum process, students voted to approve the increase in their student fees in order to fund the new swimming pool facility. Almost two-thirds of voters (64%) approved the fee increase.

The \$12 million "Aquaplex", as it is called, opened in the spring of 2007. The complex was designed by Aquatic Design Group, while PCL was retained as design-build contractor. The site occupies 125,000 square feet and hosts three pools: a 50 meter Olympic pool; a 7,500 square foot zero-depth entry recreational pool; and a 20-person hydrotherapy spa. An 8,000 square foot solar water heating panel acts as a shade structure to offset energy costs. A 4,500 square foot building contains locker rooms, administrative offices, member services, and storage facilities. Mechanical equipment is housed in a 2,100 square foot machine room.

Brailsford & Dunlavey January 2009 Page 12

UNIVERSITY OF CALIFORNIA, DAVIS

Project Drivers

By the late 1990s, University of California, Davis students were expressing growing disapproval of the lack of a studentdedicated recreation center on their campus. A potential aid in university recruitment and retention, administrators felt also that UCD should seriously consider its options for opening a recreation facility. In spring of 1999, students voted to approve the Facilities and Campus Enhancement (FACE) proposal

1	TY: O	E
S		8
E.		
E C		S
	DAVIS	

Campus Profile
UCD
Total Headcount: 30,685
Recreation Center Fee: \$68 / Quarter

referendum. This multi-facility referendum increased student fees by \$126 per quarter in order to fund three new facilities: the Activities and Recreation Center (ARC), the Schaal Aquatic Center (managed by UCD Athletics) and a Multi-Use Stadium. The spirit squad's enthusiasm for the project was instrumental in the referendum's approval.

Current Facilities

Designed by Cannon Design and built by McCarthy Building Construction, the \$46.5 million ARC opened in spring of 2004. The "fusion" building combines active recreation and student center functions. The facility is connected by bridge to an existing 7,500 seat multi-use building. Recreation-specific amenities of the 150,000 square foot ARC include:

- 12,000 square foot fitness center
- Four-court gym
- One-court gym
- Multi-activity court for indoor soccer and hockey
- Elevated jogging track
- Rock climbing wall
- Eight racquetball / squash courts
- Multi-purpose fitness rooms
- Juice bar
- Pro shop
- Locker rooms
- Lounges

The FACE fee passed in 1999 supports the cost and operation of the building. Of the \$126 quarterly fee, \$68 is allocated to the ARC.

The faculty / staff fee of \$360 is double what it had been. The increase is a result of the new facility and its accompanying equipment, the extended hours of operation and the additional fitness classes that are scheduled throughout the week. The UCD executive director of Campus Unions and Campus Recreation expected income from the employee user fees, facility rentals and food and pro shop sales to generate \$500,000 annually.

The ARC was awarded with the 2004 "Best of California" Award by McGraw-Hill Construction.

UNIVERSITY OF CALIFORNIA, IRVINE

Project Drivers

Responding to strong student demand for intramural and recreation space, the University of California, Irvine initiated a student fee referendum in spring 1996 to fund a \$26 million recreation center. At \$70 per quarter, the fee referendum was overwhelmingly approved, with over 89% of its 16,000 students voting. Subsequently, a phased master plan was developed for campus recreation facilities.

THE	10
(For	E
Co long	THE OF

Campus Profile	
UCI	
Total Headcount: 24,745	
Recreation Center Fee: \$70 / Quarter	

Current Facilities

Designed by Cannon Design, the initial component of development was the construction of a 93,000 square foot Anteater Recreation Center (ARC). By the time the facility opened in January 2000, student enrollment had grown to 20,000. The second component turned 23 acres of open land adjacent to the ARC into playing fields and outdoor courts in 2001. Approximately 400,000

entries were recorded during the ARC's first year of operation. During peak hours, the building became extremelv overcrowded. necessitating the installment of extra fitness equipment in hallways and lobbies. With enrollment numbers reaching 25,000 in fall of 2004, expansion of UCI's facilities recreation was imminent.

UCI proceeded to construct a 26,000 square foot

expansion on the ARC. Under the supervision of Langdon Wilson and RJC Architects, Soltek Pacific Construction built the \$16.4 million LEED-certified facility which opened in the summer of 2008. The expansion was funded from approximately \$8.3 million in ARC reserves and \$8.1 million in external financing.

Initial ARC components:

- 19,000 SF gymnasium
- 7,000 SF gymnasium
- 10,000 SF weight and cardio room
- Elevated jogging track
- Three racquetball courts
- Rock climbing wall
- Snack bar
- Outdoor roller hockey rink

- Wellness center
- Outdoor adventure program
- Childcare
- Outdoor heated 8-lane pool with attached wading area
- Demonstration kitchen and classroom

ARC expansion components:

- 10,000 SF of weight training and fitness space
- 6,700 SF of multipurpose activity space
- 1,000 SF wellness center
- 2,300 SF of storage and support space

The ARC expansion project was recently named "Best of 2008" by *California Construction* magazine.

UNIVERSITY OF CALIFORNIA, SAN DIEGO

Project Drivers

In the spring of 2001, UCSD initiated a student life fee referendum to fund a bundled \$100 million project which would include a student union renovation / expansion and a recreation center renovation / expansion as well as support for

athletic programs. With 44% student approval, the \$71 per quarter fee referendum did not pass.

UCSD revisited the opportunity for a student union expansion in spring of 2003. A quarterly \$39 fee was approved by 54% of student voters in a referendum to support the \$44 million project.

Campus Profile

UCSD

Total Headcount: 27,682

Recreation Center Fee: \$39 / Quarter

Current Facilities

Components of UCSD's current recreation facilities include:

- 17,000 GSF weight and fitness area
- 3,000 SF natatorium with six-lane pool and twelve-person hot tub spa
- Two heated outdoor lap / dive
 Olympic-sized pools with bleacher seating for 1,000 spectators
- Five basketball courts
- Climbing wall

- Spin room
- Squash court
- Racquetball courts
- Three multi-purpose rooms
- Boxing room
- Gymnastics facility
- Wellness center
- Massage therapy

UNIVERSITY OF CALIFORNIA, SANTA BARBARA

Project Drivers

The UCSB Recreation Center is overseen by the student-run Rec Cen Governance Board. The board sets policies and approves use of the facility while ensuring that the Rec Cen's "initial promise of always allowing for drop in recreation use" is not compromised.

The original recreation center opened in 1995 and included the following amenities:

- 2 swimming pools
- 2 weight rooms
- 2 squash courts
- 5 racquetball courts

A referendum, passed in 2000, approved an expansion of the current facility. Dubbed "Rec Cen II", the expansion opened in spring of 2005 to include a rock climbing wall, jacuzzi, pottery studio, classroom, additional locker facilities, and multi-purpose room.

Funding for the recreation center was supported by allocation from a combination of three quarterly student fees: a Recreation Center/Aquatics Complex fee of \$24.68, a RecCen Expansion fee of \$34.50 and a recreational sports fee of \$7.

Current Facilities

The Recreation Center and Aquatics Complex is 100,000 square feet and includes the following program elements:

- 12 badminton courts
- 4 basketball courts
- 1 multipurpose court
- 1 cardiovascular equipment room
- classrooms
- equipment issue area
- 2 free weight rooms
- 1 hot tub/ jacuzzi

- 2 machine weight rooms
- 2 multi-purpose activity areas
- 5 racquetball / handball / wallyball courts
- 2 squash courts
- 1 student staff / lounge area
- 2 swimming pools
- 6 volleyball courts

Brailsford & Dunlavey January 2009 Page 18

Campus Profile
UCSB
Total Headcount: 21,410
Recreation Center Fee: \$79.20 / Quarter

Plans for Expansion

The Department of Physical Activities and Recreation has access to several UCSB facilities including:

- The Events Center
- Robertson Gymnasium
- The RecCen
- Tennis Courts
- Storke Field

- Robertson Field
- The Lacrosse Pit
- Campus Pool
- Harder Stadium
- RecCenll

The RecCenII expansion is funded by a portion of the annual recreation fee paid by all UCSB students (Chart B). The total annual fee is \$237.60, which excludes the recreational sports fee because the \$7.00 per quarter recreational sports fee funds programs rather than facilities.

UCSB Recreation Fees	Fall 2004	Winter 2005	Spring 2005	Total
RecCen Expansion Fee	\$34.50	\$34.50	\$34.50	\$103.50
Recreational Sports Fee	\$7.00	\$7.00	\$7.00	\$21.00
Recreation Center/Aquatics	\$24.68	\$24.68	\$24.68	\$74.04
Complex/UCen Expansion Fee	\$20.02	\$20.02	\$20.02	\$60.06

Chart B - Fee Summary

Brailsford & Dunlavey January 2009 Page 20

Tab 4

Objectives

B&D developed an electronic survey to quantitatively test the demand for a variety of recreational spaces that could be provided at UC Riverside. The survey was designed to identify, in a statistically reliable manner, existing and projected usage patterns, and sensitivity to specific facility and service improvements. Data collected through the survey also forms the basis for B&D's recommendations for the types and amount of space needed, as described in Section 5 (Demand Analysis).

Methodology

Survey questions were designed to assess current usage patterns, activity preferences, and demographic profiles. Options were structured to maximize informational utility for projecting desirable facility characteristics and square footage requirements by type of space. Data collected could also be sorted by various demographic characteristics to identify differences in opinions among sub-populations.

All active Fall 2008 students were asked to participate in the online survey via an email invitation from the Vice Chancellor's and Student Government Offices. These 18,362 students were able to participate in the survey from November 5th through November 13th, 2008. Graduate and undergraduate students initiated 1,681 surveys, and in total, 1,137 completed surveys were collected. A copy of the student survey instrument with response frequencies, and demographic comparison table can be found in Exhibit B.

Survey Demographics

In total, 9.1% of the student population participated in the electronic survey, of which 67.6% completed the survey. Assuming a campus population of 18,362 (headcount based on contact information provided by UCR), the 1,137 complete responses established a +/- 2.9% margin of error at a 95% confidence level.

SURVEY ANALYSIS

The survey sample demographics are consistent with the overall university student demographics. Yet, due to the timing of the survey (middle of the fall semester), demographics from the 2007-2008 academic years was the control data, creating a slight skew in the survey sample variance. Demographic data was available for 17,815 students, slightly less than the number of emails provided due to either incomplete information or FERPA restrictions. The lag of the control data is exemplified in students' age, where the 18 to 19 year old population represented 35% of the survey population, while the university statistic states that it represents only 18% of the student population.

Female students slightly over represent the sample. In addition, graduate students over represent the demographic by fourteen percentage points, creating bias in the undergraduate student class standing.

Q232. What is your class standing? (All Respondents, n=1122)

Survey Data University Data

Summary of Findings

Student Preference

Students and the University recognize the importance of recreational opportunities in supporting quality of life, stress mitigation, mental health, and academic success. As a result, over 53% of students believe that improvements to recreation should be a high or very high priority for the University and only 11% believe that a fitness facility is a low or very low priority.

The primary factor that determines student participation with recreation is their academic class

Brailsford & Dunlavey January 2009 Page 2 schedule (92%), followed by work schedule (82%) and facility availability (81%). These findings are congruent with the determining factors of UCR students' marginal increase in facility usage: 85% will use the facility more if facilities and equipment were always available; 82% if wider variety of facility and equipment were available; 79% if more wellness programs were available; 77% if more instructional classes were available; and 75% if facilities were better quality. Ninety-four percent of students believe that improvements to the recreation center will have a positive effect in providing healthy lifestyle options and 89% believe that it will improve the quality of life at UCR.

Q151.-Q156. How important are the following factors in determining when you would choose to participate in recreational activities?

As UCR considers improvements to its recreation facilities, the University should consider students' top factors for any enhancement project. For students, it is important that improvements should focus on providing healthy lifestyle options (94%), opportunities to reduce stress (93%), reduction of overcrowding in recreation facility (92%), affordable tuition and fees (91%), and enhancing the campus community (89%).

Very important Important Very important

Significant impact Moderate impact Little impact No impact

Although students show great interest in fitness and recreation, only 40% of respondents indicate that they partake in recreational / fitness activities. The top five reasons students do not participate are "I do not have time to exercise" (30%); "the UCR recreation facility is too crowded" (18%), "I cannot find parking near the facility" (17%), "I am not aware of the recreational programs or services offered" (16%), and "I do not feel comfortable working out in the existing facilities" (10%).

The majority of students are unfamiliar with the range of recreational opportunities available on the UCR campus. The SRC is the most recognized facility. Fifty three percent of those familiar with the facility believe it is in excellent or very good condition. Students are significantly less familiar with the Outdoor Complex, Sports Complex, Glen Mor Fields, Challenge Course, and Physical Education Pool. The Physical Education Pool received the largest negative response with 36% of students believe the facility to be of poor or very poor quality.

Q54.-Q60. The quality of each of the following recreation facilities is: (Please

Brailsford & Dunlavey January 2009 Page 4 In terms of all recreation facilities, only 36% believe that it is a little better or much better than expected. In addition, comparing other facilities participants are familiar with, 19% agree that UCR's facility either excellent or very good, 29% agree that it is satisfactory, 13% agree that it is poor or very poor, and 36% do not know. Overall, respondents are satisfied or very satisfied with their ability to find their way inside the SRC (70%), convenience of hours (68%), and condition / appearance of building (67%). However, respondents are unsatisfied or very unsatisfied with the availability of parking (55%), cost of services (23%), and convenience of walking paths to the SRC (15%).

Off-campus Market

Nearly two-thirds of survey respondents live off campus, with average commutes times ranging from 10 minutes to 25 minutes from campus. There are numerous fitness facilities within a 25-minute drive time radius of UCR's campus; the most popular facilities students frequent are 24-hour Fitness, LA Fitness, and Bally's Total Fitness, who represent 41%, 23%, and 15% of responses, respectively. According to their respective websites, 24-hour Fitness, LA Fitness, and Bally's Total Fitness, 24-hour Fitn

Among those who hold off-campus memberships, the average monthly rate is \$29 per month, which is consistent what was heard in focus groups.

Wellness Programs

Wellness is an important aspect of student life at UCR. Earlier data supports this notion, as 94% of respondents believe providing healthy lifestyle options for UCR students will have a significant or moderate impact in their lives. Fifty-two percent of respondents say that they are very interested or somewhat interested in paying a nominal fee for recreation related services: 65% are interested in healthy cooking classes, 62% are interested in massage services, 61% are interested in fitness assessments, 59% are interested in nutrition instruction / education, and 58% are interested in sports medicine services.

A broad analysis of students participation of full-quarter, half-quarter, two-week, and singlesession programs relating to weight management, fitness education, stress management, family programs, fitness assessment, and nutrition education is analyzed to understand frequency of use. Results indicate that a significant population is willing to pay a fee to participate in weight management programs and fitness education for a full quarter and fitness assessment and nutrition education on a single session basis.

Q194. to Q199. If the following wellness programs were offered for reasonable fees, which of the following would you participate in?

Fee Support

Three project concepts were tested for this feasibility study: Concept A, Concept B, and Concept C. Concept A is the highest amenity option and demands the highest fee (\$180 to \$190) while Concept C is the lowest amenity option and demands the lowest fee (\$100 to \$110).

	Concept A	Concept B	Concept C
Fees Tested (per quarter)	\$180 to \$190	\$150 to \$160	\$100 to \$110
Building Square Feet (expansion total)	92,000	70,000	40,000
Weight & Fitness Square Feet	13,000	12,000	11,000
Multi-sport Court	2	1	1
Multi-purpose Activity Court	1	1	N/A
Multi-purpose / Group Fitness Rooms	3	2	1
Elevated Indoor Jogging Track	1	N/A	N/A
Indoor Rock Climbing / Bouldering Wall	1	1	1
Outdoor Pool	Yes	Yes	Yes
Outdoor Excursion Resource / Rental Center	Yes	Yes	Yes
Wellness Center	Yes	Yes	Yes
Juice Bar / Lounge	Yes	Yes	Yes

Students agree that there is a need for a recreation facility improvement. Seventy-nine percent of respondents indicated their interest in one of three concepts: 27% for Concept A, 18% for Concept B, and 35% for Concept C. However, 21% of respondents did not prefer any of the options. In terms of student support, 53% are very likely or somewhat likely to support Concept A, 52% for Concept B, and 54% for Concept C. When the data was analyzed across demographic data, students' very likeliness or somewhat likeliness to support Concepts A, B, and C were similar.

Q219.-Q221. If you were voting on this project only, how likely would you be to support it?

Brailsford & Dunlavey January 2009 Page 8

Tab 5

Objectives & Methodology

Demand Based Programming ("DBP") is a proprietary process developed by B&D to utilize survey data for making square footage recommendations. The information is obtained from questions 102 through 149 of the internet survey which read, "If all of the improvements described in the previous section were implemented how often and during which time period would you participate in the following activities?" All current UCR students were invited to participate in the survey.

Various "activity" spaces were listed on the survey and are found at the conclusion of this narrative. Activity spaces are those spaces that are programmed based on the number of potential users and the distribution of usage over the course of a typical day. Certain spaces cannot be analyzed using the DBP information because they are based on specific user groups and are not campus wide, including administrative offices, large event space, and conference / meeting rooms.

Square foot allocations patterns for each activity are included in Exhibit C. The priorities are illustrated based on the depth and breadth of demand analysis and the recommended space allocation of each program area. Space utilization schedules for each activity are included in Exhibit D.

Summary of Findings

The UC Riverside community represents an active population with demand for recreational activities exceeding the capacity afforded by the existing facilities. B&D's demand analysis demonstrates that certain program components may need to be doubled or tripled to adequately accommodate demand.

Demand Based Programming

Table 5.1 illustrates the depth and breadth of student demand for the 24 activity spaces tested in the survey. The spaces are prioritized based on "Depth" of demand, representing the number of people who will participate in an activity at least two times per week, and "Breadth" of demand, representing the number of people who will participate in an activity with any frequency, even if only occasionally. Thus, depth of demand illustrates the extent to which each activity is integral to the lifestyles of the UCR community, while breadth of demand illustrates the general popularity of an activity throughout the total campus population (table 5.1).

Activity	Depth	Breadth
Cardiovascular Fitness Machines	43.6%	69.7%
Weight Machines (Selectorized)	28.9%	52.0%
Weight Training (Free Weights)	28.7%	50.8%
Indoor Walking / Jogging (Track)	24.9%	47.1%
Group Fitness	22.8%	51.3%
Lap Swimming	20.4%	44.0%
Yoga, Stretch or Pilates	17.4%	41.9%
Outdoor Walking / Jogging (Track)	17.3%	43.2%
Recreational / Leisure Swimming/Aquatics	14.3%	42.8%
Indoor Basketball	11.1%	31.4%
Social Lounge	9.7%	37.2%

Martial Arts	6.9%	21.3%
Outdoor Basketball	6.7%	23.5%
Indoor Soccer	6.5%	19.6%
Table Tennis	6.0%	25.8%
Outdoor Soccer	5.3%	18.2%
Volleyball	4.6%	20.3%
Roller / Floor Hockey	4.2%	18.6%

Table 5.1: Depth and Breadth Analysis

When the student activity spaces are ranked by depth and breadth of demand, the first priorities, identified through high depth and breadth, are cardio fitness machines, weight machines, weight training (free weights), indoor walking / jogging, group fitness, and lap swimming (table 5.2). The second priority activity spaces include yoga, outdoor walking / jogging, and recreational swimming. The third priority activity spaces include indoor basketball, social lounge space, rock climbing, outdoor tennis, racquetball, and billiards.

Activity	Priority
Cardiovascular Fitness Machines	first
Weight Machines (Selectorized)	first
Weight Training (Free Weights)	first
Indoor Walking / Jogging (Track)	first
Group Fitness	first
Lap Swimming	first
Yoga, Stretch or Pilates	second
Outdoor Walking / Jogging (Track)	second
Recreational / Leisure Swimming/Aquatics	second
Indoor Basketball	third
Social Lounge	third
Rock Climbing (Indoor Climbing Wall)	third
Outdoor Tennis	third
Racquetball / Handball	third
Billiards	third
Badminton	fourth
Water Aerobics	fourth
Martial Arts	fourth
Outdoor Basketball	fourth
Indoor Soccer	fourth
Table Tennis	fourth
Outdoor Soccer	fifth
Volleyball	fifth
Roller / Floor Hockey	fifth

Table 5.2: Priority Analysis

Peak demand is developed through analysis of projected participation numbers and B&D's planning rules of thumb for each individual activity type. A campus headcount of 18,000 was used to project space demand. B&D recommends that the highest priority spaces (based on depth and breadth of demand) be accommodated to a greater extent than lower priority spaces (table 5.3). It is not advisable to completely meet peak demand as significant portions of space may be underutilized through the course of the day. The first priority activities are recommended to be provided at 75% to 85% of peak demand, second priority activities at 55% to 65%, third priority activities at 40% to 50%, fourth priority activities at 25% to 35%, and fifth priority activities at 10% to 20% of peak demand.

Additionally, discount factors have been integrated into the demand analysis. A "new year's resolution" discount of 25% has been applied to all projections to account for the potential disparity between planned and actual activity.

Each activity was analyzed individual to determine the space needs for peak demand during the most active time period. Factors in the analysis include times tested on survey, frequency of participation, number of participants, and turnover rates. For example, B&D assumes that one cardio fitness machine user will use the machine for 30 minutes and occupy a space of 55nsf (are for the machine and walk space behind). If 16 students indicated that they would use these machines between the hours of 4pm and 6pm, a total of 220nsf (four machines) would be required to meet demand. These numbers are adjusted by frequency of participation and then extrapolated to reach the peak demand calculation. Peak demand is then multiplied by the priority accommodation factor to reach B&D's recommendations.

DEMAND ANALYSIS

	Activity	Priority Category	Peak Accommodation	Space Type	Peak Demand			Based On Demand
1	Cardiovascular Fitness Machines	first	75% to 85%	Sq. Ft.	10,042	7,500	to	8,500
2	Weight Machines (Selectorized)	first	75% to 85%	Sq. Ft.	8.926	6,700	to	7.600
3	Weight Training (Free Weights)	first	75% to 85%	Sq. Ft.	8,793	6,600	to	7,500
4	Indoor Walking / Jogging (Track)	first	75% to 85%	Sq. Ft.	8,090	6,100	to	6,900

Table 5.3: Space Allocation

1 COMBINED 1:	27,800	20,800	to	23,600
(Fitness Machines, Free Weights and Weight Machines) 2 COMBINED 2	23,000	13,200	to	15,400
(Group Fitness, Yoga, Stretch or Pilates, and Martial Arts)				

*All square feet measurements noted are net (assignable) square feet.

Space Reconciliation

The University provides the campus population with multiple recreational facility opportunities. UCR students utilize the following spaces for open recreational activities, self-directed fitness, and student and community programming. The facilities include the:

- Student Recreation Center,
- Glen Mor Fields,
- Outdoor Complex,
- Sports Complex,
- Challenge Course, and
- Physical Education Pool.

Although multiple facilities are provided to meet the needs of students and the UCR community, a significant gap between demand and existing spaces exists (table 5.4). Additionally, several of the facilities available to students provide only limited access and have been discounted from the existing recreation spaces totals, namely the Physical Education Pool. Demand for combined weight and fitness spaces (cardio fitness, weight training, and weight machines) is higher than

the existing spaces by between 14,300nsf and 17,100nsf, and group fitness space by between 8,200nsf and 10,400nsf.

	Space Type	Existing Rec Space			Based On Demand	Dif	ferer	ice
Weight and Fitness	Sq. Ft.	6,500	20,800	to	23,600	(14,300)	to	(17,100)
Group Fitness	Sq. Ft.	5,000	13,200	to	15,400	(8,200)	to	(10,400)
Indoor Walking / Jogging	Sq. Ft.	0	6,100	to	6,900	(6,100)	to	(6,900)
Outdoor Walking / Jogging	Lanes	2	4	to	5	(2)	to	(3)
Lap Swimming	Lanes	0	18	to	20	(18)	to	(20)
Recreational Swimming / Water Aerobics	Sq. Ft.	0	6,000	to	7,100	(6,000)	to	(7,100)
Indoor Rock Climbing Wall	Linear Feet	0	24	to	31	(24)	to	(31)
Outdoor Tennis	Courts	9	11	to	14	(2)	to	(5)

Outdoor Basketball	Courts	2	2	to	3	0	to	(1)

 Table 5.4:
 Space Reconciliation

*All square feet measurements noted are net (assignable) square feet.

B&D's analysis demonstrates that significant demand for recreational activities and space is present that is currently being unmet by the existing SRC. Expansion to the SRC should focus on areas of the greatest delta between need and existing facility. Such spaces include an outdoor lap and leisure pool, expanded weight and fitness space, additional multi-purpose rooms, and other spaces that will expand the breadth of services of the facility including social spaces and an indoor climbing wall.

Brailsford & Dunlavey January 2009 Page 6

Exhibit A

The following exhibit contains data tables for information B&D collected during its benchmark analysis of other institutions within the state of California with either new, recently expanded, or confirmed construction of student recreation facilities. Data collected included basic demographic information, tuition and fees, recreation centers size, and facility components. This information was used to develop the case studies found within the report.

NOTES

University enrollment data is approximate based on academic year **2008-09** as presented by the Princeton Review and the universities' own world wide web sites. Facilities at CSULB and CSUN are still in the design or construction phases, changes to

total gsf or individual program elements may occur.

Cal Poly is currently designing an expansion to their existing 95,000gsf recreation center. Total spaces including the expansion have been used in these tables. Students will be charged an additional \$195 per year upon facility completion in fall 2011.

SDSU is currently considering a 6,000-7,000nsf second story expansion of cardio / fitness space, however this is not included in the benchmarking.

Notes:

Amenities include those that are featured in projects not yet completed. Classes, personal training and massage therapy are not always free Sources: University websites and university administrators

= outdoor recreation space / amenity

= University has highlighted amenity within Recreation Center or Campus Recreation program

Cal Poly does not have a rec dept; Associated Students, Inc. manages the union and rec center

CSU Long Beach Dept of Club Sports & Recreation does not operate any facilities; current facilities are managed by Student Life & Development as well as the depts of athletics and kinesiology

Exhibit B

The following exhibit contains the raw results from the student survey. Results are listed as students responded with no additional analysis. These results were analyzed and cross tabulated to generate the survey analysis section and B&D's recommendations on the referendum plan.

UC Riverside Recreation Expansion

Description: online for review on COB monday 10/27 if possible. Thanks. Date Created: 10/24/2008 1:56:40 AM Date Range: 11/5/2008 12:00:00 AM - 11/13/2008 11:59:00 PM Total Respondents: 1681

Q1. On average, how often and at what time of the day do you TYPICALLY use the current recreational sports and fitness facilities on campus? (Please SELECT ONE frequency and ONE time for each facility) - Aerobics (Dance, Slide, Spinning, Step)

Count	Percent	
16	1.03%	Daily
97	6.26%	2-4 times/week
65	4.19%	Once/week
176	11.35%	Sometimes
1196	77.16%	Never
1550	Respondents	

Q2. On average, how often and at what time of the day do you TYPICALLY use the current recreational sports and fitness facilities on campus? (Please SELECT ONE frequency and ONE time for each facility) - Badminton

Count	Percent	
12	0.78%	Daily
57	3.68%	2-4 times/week
46	2.97%	Once/week
229	14.79%	Sometimes
1204	77.78%	Never
1548	Respondents	

Q3. On average, how often and at what time of the day do you TYPICALLY use the current recreational sports and fitness facilities on campus? (Please SELECT ONE frequency and ONE time for each facility) - Basketball

Count	Percent	
26	1.68%	Daily
94	6.07%	2-4 times/week
76	4.91%	Once/week
257	16.60%	Sometimes
1095	70.74%	Never
1548	Respondents	

Q4. On average, how often and at what time of the day do you TYPICALLY use the current recreational sports and fitness facilities on campus? (Please SELECT ONE frequency and ONE time for each facility) - Cardiovascular Fitness Machines

Count	Percent		
92	5.86%		Daily
402	25.61%		2-4 times/week
168	10.70%	-	Once/week
357	22.74%		Sometimes
551	35.10%		Never
1570	Respondents		

Q5. On average, how often and at what time of the day do you TYPICALLY use the current recreational sports and fitness facilities on campus? (Please SELECT ONE frequency and ONE time for each facility) - Challenge Course

Count	Percent	
11	0.72%	Daily
23	1.50%	2-4 times/week
29	1.89%	Once/week
164	10.67%	Sometimes
1310	85.23%	Never
1537	Respondents	

Q6. On average, how often and at what time of the day do you TYPICALLY use the current recreational sports and fitness facilities on campus? (Please SELECT ONE frequency and ONE time for each facility) - Free Weights

Count	Percent	
96	6.11%	Daily
304	19.35%	2-4 times/week
114	7.26%	Once/week
266	16.93%	Sometimes
791	50.35%	Never
1571	Respondents	

Q7. On average, how often and at what time of the day do you TYPICALLY use the current recreational sports and fitness facilities on campus? (Please SELECT ONE frequency and ONE time for each facility) - Lap Swimming

Count	Percent		
18	1.16%	Daily	
49	3.17%	2-4 times/week	
28	1.81%	Once/week	
107	6.92%	Sometimes	
1344	86.93%	Never	
1546	Respondents		

Q8. On average, how often and at what time of the day do you TYPICALLY use the current recreational sports and fitness facilities on campus? (Please SELECT ONE frequency and ONE time for each facility) - Martial Arts

Count	Percent	
10	0.65%	Daily
32	2.08%	2-4 times/week
16	1.04%	Once/week
55	3.57%	Sometimes
1428	92.67%	Never
1541	Respondents	

Q9. On average, how often and at what time of the day do you TYPICALLY use the current recreational sports and fitness facilities on campus? (Please SELECT ONE frequency and ONE time for each facility) - Outdoor Excursion

Count	Percent	
16	1.04%	Daily
29	1.88%	2-4 times/week
36	2.33%	Once/week
218	14.11%	Sometimes
1246	80.65%	Never
1545	Respondents	

Q10. On average, how often and at what time of the day do you TYPICALLY use the current recreational sports and fitness facilities on campus? (Please SELECT ONE frequency and ONE time for each facility) - Racquetball, Squash, Handball

Count	Percent	
11	0.71%	Daily
59	3.82%	2-4 times/week
90	5.83%	Once/week
291	18.85%	Sometimes
1093	70.79%	Never
1544	Respondents	

Q11. On average, how often and at what time of the day do you TYPICALLY use the current recreational sports and fitness facilities on campus? (Please SELECT ONE frequency and ONE time for each facility) - Recreational or Leisure Swimming

Count	Percent	
14	0.91%	Daily
29	1.88%	2-4 times/week
38	2.47%	Once/week
107	6.95%	Sometimes
1351	87.78%	Never
1539	Respondents	

Q12. On average, how often and at what time of the day do you TYPICALLY use the current recreational sports and fitness facilities on campus? (Please SELECT ONE frequency and ONE time for each facility) - Soccer

Count	Percent	
9	0.59%	Daily
24	1.56%	2-4 times/week

Exhibit C
Student Demand Analysis Tables

The following tables include the basis for B&D's demand based programming. The tables for each individual activity calculate the percentage of students using each space at their desired time, and calculates total users and space needs for an estimated 18,000 headcount of students. Depth and breadth tables were also generated from the demand based programming questions which, combined with peak demand from the activity tables, generated B&D's space recommendations.

6 - 8 AM	8 AM - noon	Noon - 1 PM	1- 4 PM	4 - 6 PM	6 - 9 PM	9 PM - Midnight				
4,980	2,282	2,699	3,447	6,570	8,090	2,934				

Definitions: Activity Frequency= How often during the week (once per week = 1/7=14%) Turnover Factor= The reciprical amount of time the space is "turned over" over the allocated time.

* Intensity Factor = Activity Frequency x Turnover Factor.

** THIS ACTIVITY ASSUMES 120 SQUARE FEET PER USER FOR A DURATION OF 0.33 HOURS.

SPACE DEMAND

N	NUMBER OF SQ. FT. **										
	6 - 8 AM	8 AM - noon	Noon - 1 PM	1- 4 PM	4 - 6 PM	6 - 9 PM	9 PM - Midnight				
Γ	326	339	2,478	1,552	2,913	3,349	1,141				

Definitions: Activity Frequency= How often during the week (once per week = 1/7=14%) Turnover Factor= The reciprical amount of time the space is "turned over" over the allocated time.

* Intensity Factor = Activity Frequency x Turnover Factor.

** THIS ACTIVITY ASSUMES 20 SQUARE FEET PER USER FOR A DURATION OF 1.50 HOURS.

SPACE DEMAND

	NUMBER OF S	SQ. FT. **					
ſ	6 - 8 AM	8 AM - noon	Noon - 1 PM	1- 4 PM	4 - 6 PM	6 - 9 PM	9 PM - Midnight
ſ	4,716	2,859	4,356	4,248	8,793	8,491	4,010

Definitions: Activity Frequency= How often during the week (once per week = 1/7=14%) Turnover Factor= The reciprical amount of time the space is "turned over" over the allocated time.

* Intensity Factor = Activity Frequency x Turnover Factor.

** THIS ACTIVITY ASSUMES 55 SQUARE FEET PER USER FOR A DURATION OF 0.75 HOURS.

Student Demand Based Programming Charts and Space Prioritization Each activity was analyzed individual to determine the space needs for peak demand during the most active time period. Factors in the analysis include times tested on survey, frequency of participation, number of participants, and turnover rates. For example, B&D assumes that one cardio fitness machine user will use the machine for 30 minutes and occupy a space of 55nsf (are for the machine and walk space behind). If 16 students indicated that they would use these machines between the hours of 4pm and 6pm, a total of 220nsf (four machines) would be required to meet demand. These numbers are adjusted by frequency of participation and then extrapolated to reach the peak demand calculation. Peak demand is then multiplied by the priority accommodation factor to reach B&D's recommendations.

Student Referendum Plan

ACTIVITY PRIORITY ANALYSIS - BY DEPTH OF DEMAND

Student Responses

	Activity	Number	Percent
1	Cardiovascular Fitness Machines	520	43.6%
2	Weight Machines (Selectorized)	344	28.9%
3	Weight Training (Free Weights)	342	28.7%
4	Indoor Walking / Jogging (Track)	297	24.9%
5	Group Fitness	272	22.8%
6	Lap Swimming	243	20.4%
7	Yoga, Stretch or Pilates	208	17.4%
8	Outdoor Walking / Jogging (Track)	206	17.3%
9	Recreational / Leisure Swimming	170	14.3%
10	Indoor Basketball	132	11.1%
11	Social Lounge	116	9.7%
12	Rock Climbing (Indoor Climbing Wall)	114	9.6%
13	Outdoor Tennis	110	9.2%
14	Racquetball / Handball	104	8.7%
15	Billiards	98	8.2%
16	Badminton	95	8.0%
17	Water Aerobics	92	7.7%
18	Martial Arts	82	6.9%
19	Outdoor Basketball	80	6.7%
20	Indoor Soccer	77	6.5%
21	Table Tennis	71	6.0%
22	Outdoor Soccer	63	5.3%
23	Volleyball	55	4.6%
24	Roller / Floor Hockey	50	4.2%

Note:

Depth of Demand is measured by the number of respondents indicating they would engage in a specific activity at least two times per week. The measure is significant in that it indicates the extent to which activities are integral to the regular routine of the University population.

Student Referendum Plan

ACTIVITY PRIORITY ANALYSIS - BY BREADTH OF DEMAND

Student Responses

	Activity	Number	Percent
1	Cardiovascular Fitness Machines	831	69.7%
2	Weight Machines (Selectorized)	620	52.0%
3	Group Fitness	612	51.3%
4	Weight Training (Free Weights)	605	50.8%
5	Indoor Walking / Jogging (Track)	562	47.1%
6	Lap Swimming	525	44.0%
7	Outdoor Walking / Jogging (Track)	515	43.2%
8	Recreational / Leisure Swimming	510	42.8%
9	Yoga, Stretch or Pilates	500	41.9%
10	Rock Climbing (Indoor Climbing Wall)	484	40.6%
11	Social Lounge	443	37.2%
12	Racquetball / Handball	420	35.2%
13	Billiards	414	34.7%
14	Indoor Basketball	374	31.4%
15	Outdoor Tennis	370	31.0%
16	Badminton	351	29.4%
17	Table Tennis	308	25.8%
18	Water Aerobics	301	25.3%
19	Outdoor Basketball	280	23.5%
20	Martial Arts	254	21.3%
21	Volleyball	242	20.3%
22	Indoor Soccer	234	19.6%
23	Roller / Floor Hockey	222	18.6%
24	Outdoor Soccer	217	18.2%

Note:

Breadth of Demand is measured by the number of respondents indicating they would engage in a specific activity even if only occasionally. The measure is significant in that it indicates the extent to which activities have some amount of recreational appeal across the University population.

Student Referendum Plan

ACTIVITY PRIORITY ANALYSIS - BY DEPTH AND BREADTH OF DEMAND

Student Responses

	Activity	Depth	Breadth
1	Cardiovascular Fitness Machines	43.6%	69.7%
2	Weight Machines (Selectorized)	28.9%	52.0%
3	Weight Training (Free Weights)	28.7%	50.8%
4	Indoor Walking / Jogging (Track)	24.9%	47.1%
5	Group Fitness	22.8%	51.3%
6	Lap Swimming	20.4%	44.0%
7	Yoga, Stretch or Pilates	17.4%	41.9%
8	Outdoor Walking / Jogging (Track)	17.3%	43.2%
9	Recreational / Leisure Swimming	14.3%	42.8%
10	Indoor Basketball	11.1%	31.4%
11	Social Lounge	9.7%	37.2%
12	Rock Climbing (Indoor Climbing Wall)	9.6%	40.6%
13	Outdoor Tennis	9.2%	31.0%
14	Racquetball / Handball	8.7%	35.2%
15	Billiards	8.2%	34.7%
16	Badminton	8.0%	29.4%
17	Water Aerobics	7.7%	25.3%
18	Martial Arts	6.9%	21.3%
19	Outdoor Basketball	6.7%	23.5%
20	Indoor Soccer	6.5%	19.6%
21	Table Tennis	6.0%	25.8%
22	Outdoor Soccer	5.3%	18.2%
23	Volleyball	4.6%	20.3%
24	Roller / Floor Hockey	4.2%	18.6%

Note:

A balanced approach to activity prioritization considers the implications of both depth and breadth of demand. In this analysis, breadth of demand can be used to reorder activities within their priority categories based on depth. However, it could be arranged based on breadth of demand as well. These rankings help to inform the priority reconciliation of activity demand.

Student Referendum Plan

PRIORITY ORDER OF ACTIVITIES/PROGRAM RECONCILIATION FOR STUDENT POPULATION

		Priority	Peak	Space	Peak	Space Allocation		
	Activity	Category	Accommodation	Туре	Demand	Based on Pr	ioritizatio	n of Demand
1	Cardiovascular Fitness Machines	first	75% to 85%	Sq. Ft.	10,042	7,500	to	8,500
2	Weight Machines (Selectorized)	first	75% to 85%	Sq. Ft.	8,926	6,700	to	7,600
3	Weight Training (Free Weights)	first	75% to 85%	Sq. Ft.	8,793	6,600	to	7,500
4	Indoor Walking / Jogging (Track)	first	75% to 85%	Sq. Ft.	8,090	6,100	to	6,900
5	Group Fitness	first	75% to 85%	Sq. Ft.	9,805	7,400	to	8,300
6	Lap Swimming	first	75% to 85%	Lanes	24	18	to	20
7	Yoga, Stretch or Pilates	second	55% to 65%	Sq. Ft.	8,324	4,600	to	5,400
8	Outdoor Walking / Jogging (Track)	second	55% to 65%	Lanes	7	4	to	5
9	Recreational / Leisure Swimming	second	55% to 65%	Sq. Ft.	8,344	4,600	to	5,400
10	Indoor Basketball	third	40% to 50%	Courts	13	5	to	7
11	Social Lounge	third	40% to 50%	Sq. Ft.	3,349	1,300	to	1,700
12	Rock Climbing (Indoor Climbing Wall)	third	40% to 50%	Linear Feet	61	24	to	31
13	Outdoor Tennis	third	40% to 50%	Courts	27	11	to	14
14	Racquetball / Handball	third	40% to 50%	Courts	23	9	to	12
15	Billiards	third	40% to 50%	Tables	23	9	to	12
16	Badminton	fourth	25% to 35%	Courts	24	6	to	8
17	Water Aerobics	fourth	25% to 35%	Sq. Ft.	5,784	1,400	to	2,000
18	Martial Arts	fourth	25% to 35%	Sq. Ft.	4,896	1,200	to	1,700
19	Outdoor Basketball	fourth	25% to 35%	Courts	8	2	to	3
20	Indoor Soccer	fourth	25% to 35%	Courts	5	1	to	2
21	Table Tennis	fourth	25% to 35%	Tables	17	4	to	6
22	Outdoor Soccer	fifth	10% to 20%	Fields	5	1	to	1
23	Volleyball	fifth	10% to 20%	Courts	5	1	to	1
24	Roller / Floor Hockey	fifth	10% to 20%	Courts	4	0	to	1
					-	•		
1	COMBINED 1:				27,800	20,800	to	23,600
	(Fitness Machines, Free Weights and Weight Machines)							
2	COMBINED 2				23,000	13,200	to	15,400
	(Group Fitness, Yoga, Stretch or Pilates, and Martial Arts)							

Exhibit D

Student utilization graphs were created for each activity tested on the student survey. These graphs chart the amount of space needed to meet demand throughout the course of a day.
